### Abstract FR2486386

IT IS INCREASINGLY CLEAR THAT ONLY THE EARLY DETECTION OF TUMOR TREATMENT AND CAN FACILITATE THE MAKING HIGHLY EFFECTIVE.  
CONTACT THERMOGRAPHY already yielding significant results, ENSURING THE EFFECTIVENESS OF DIAGNOSIS OF MORE THAN 80 CASES. The impedance subcutaneous allows exploration "DEEP" BY ELECTRICAL METHODS ALSO A HIGH DEGREE OF CERTAINTY The combination of these two methods in a single device, using these same basic components, is the object of the present invention.  
The device with a multi-electrode A SCANNING ELECTRON Switches DATA ON THERMAL AND LCR DIAL CENTRAL RECEIVER, WHICH REFLECTS THIS INFORMATION IN A COLOR IMAGE MATRIX, provided by LED'S SIMPLE, FAST AND DIAGNOSIS FOR PHOTO- CONTACT PRINTING ON FILMS Instant. UNIT IS FOR DOCTORS and can be handled even by nonmedical personnel.
